FREE SPINS SPECIFICATION

(How? How is this system designed?)

Campaign Flow

The Free Spins Campaign features a tri-wallet system on the game-client interface, comprising the **Cash Wallet**, **Bonus Wallet**, and **Free Spins Wallet**.

When players are credited with free spins, these are deposited into their **Free Spins** Wallet, where they are available for use. Winnings accrued from these spins are then transferred to the **Bonus Wallet** and are contingent upon the completion of a **Turnover Requirement**.

Upon satisfying the turnover criteria within the **Bonus Wallet**, the system will automatically transfer the winnings — up to a predetermined maximum amount — to the player's **Cash Wallet**.

It is important to note that players have the flexibility to navigate between these wallets during their gaming sessions.

However, the wagering requirements for any winnings can only be met within the **Bonus Wallet**; the **Cash Wallet** remains distinct and separate to fulfil turnover obligations.

Built-In Promo System

Cash Wallet

The Cash Wallet serves as the primary wallet for gameplay.

The balance in the Cash Wallet is **withdrawable**.

Bonus Wallet

The Bonus Wallet functions as the designated wallet for players to fulfill the turnover requirement for the winning amount from the Free Spins Wallet.

Players must meet the turnover requirement to withdraw the **winning amount** within the specified range of minimum and maximum withdrawal amounts. If no turnover requirement is necessary from Free Spins, the winning amount from Free Spins within minimum and maximum withdrawal range will go directly to the Cash Wallet.

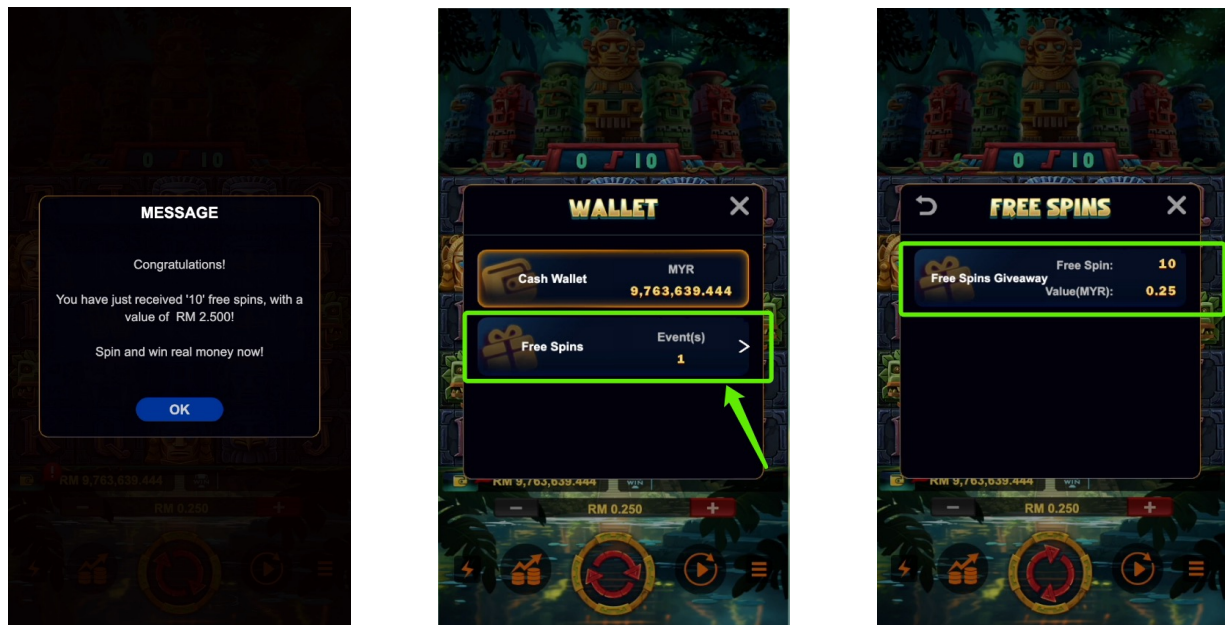

The winning amount will be transferred from the Bonus Wallet to the Cash Wallet through the **'CPSettle'** API.

Free Spins Wallet

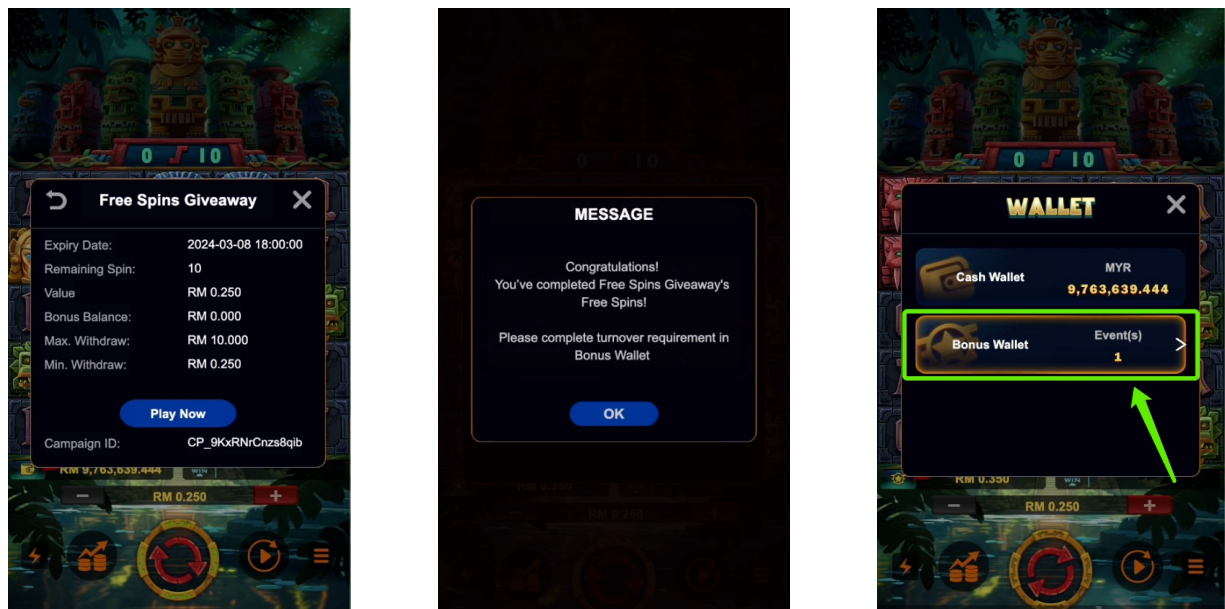

Free Spin Wallet is where players receive Free Spins. Players must use up all the Free Spins before they can proceed to fulfill the turnover requirement in the Bonus Wallet or withdraw winnings to the Cash Wallet within the specified minimum and maximum withdrawal amounts.

Detailed Flow 1

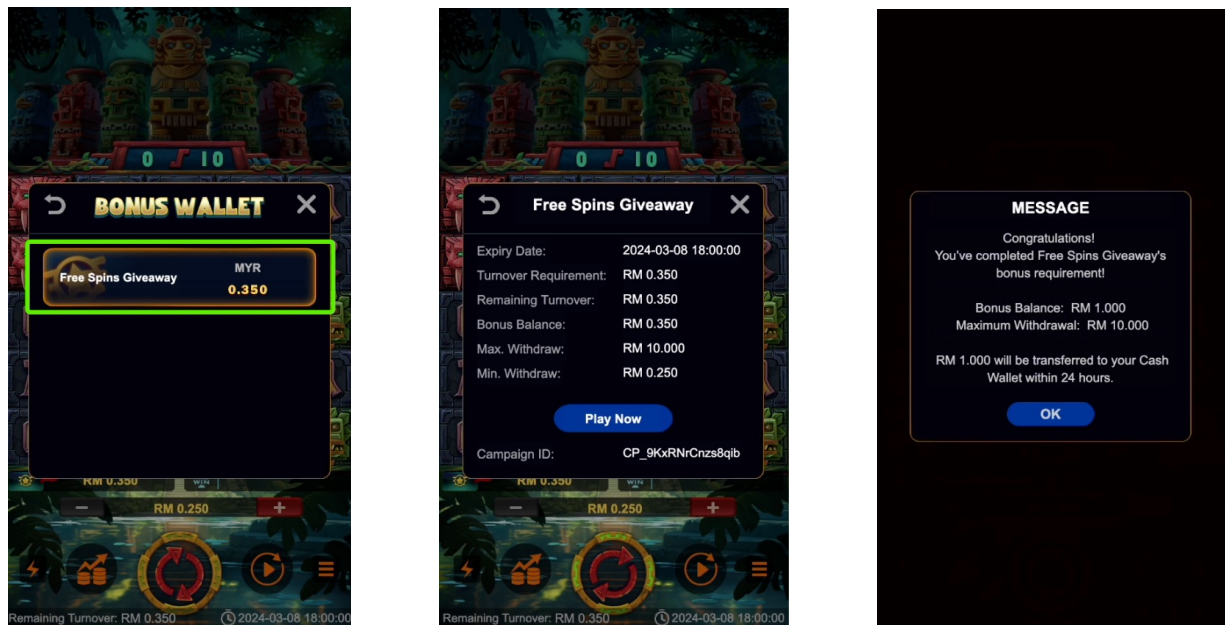

When a player is eligible for the free spins, a pop-up message will appear during gameplay.

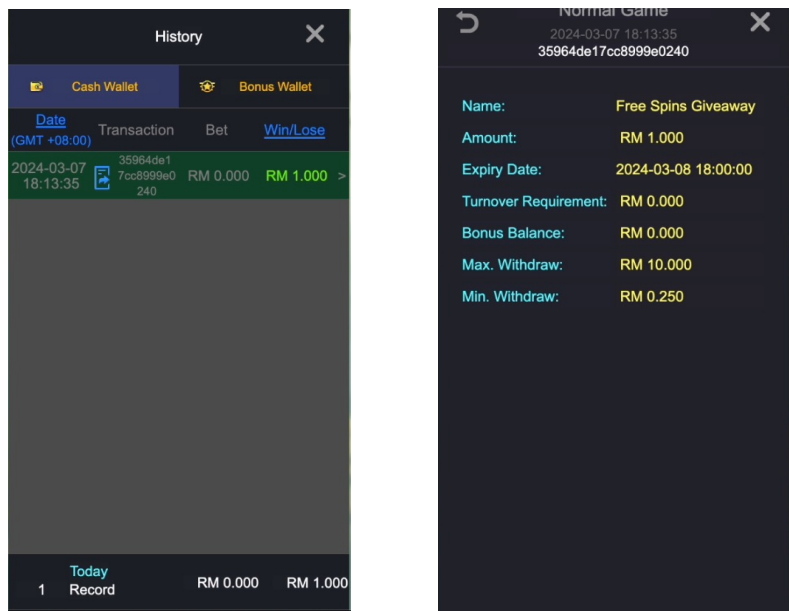

After all free spins have been utilized, the final winning will be transferred to the **BONUS WALLET** for turnover requirement fulfillment.

Detailed Flow 1

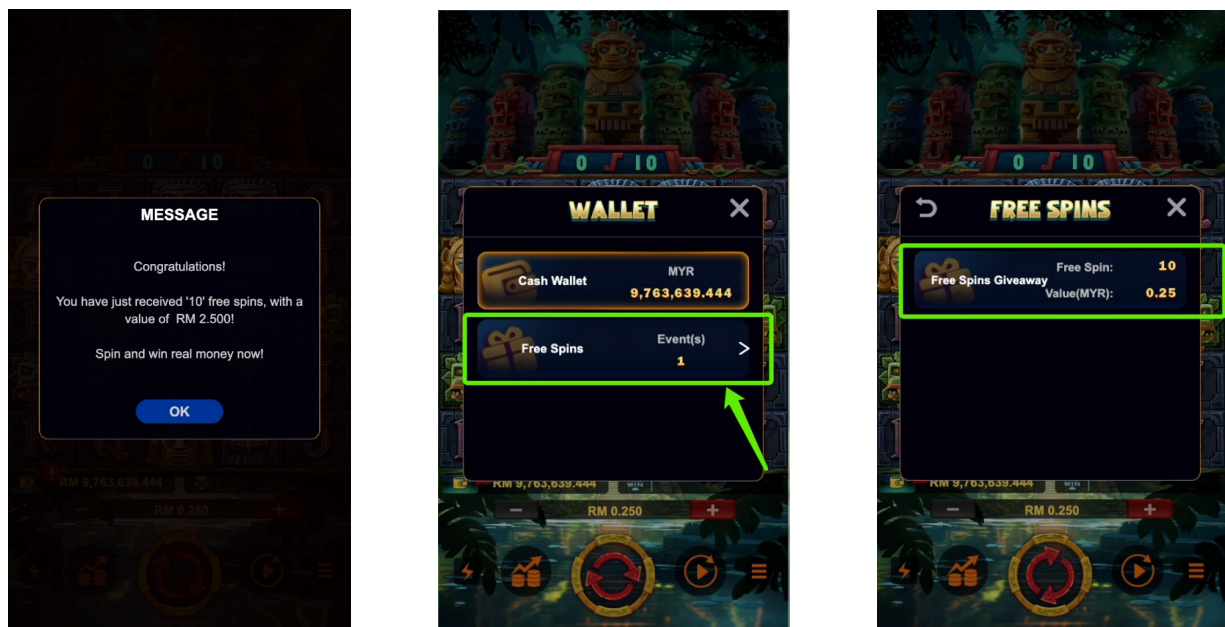

Upon fulfilling the turnover requirement, the balance up to the specified maximum limit will automatically be transferred to the **CASH WALLET**.

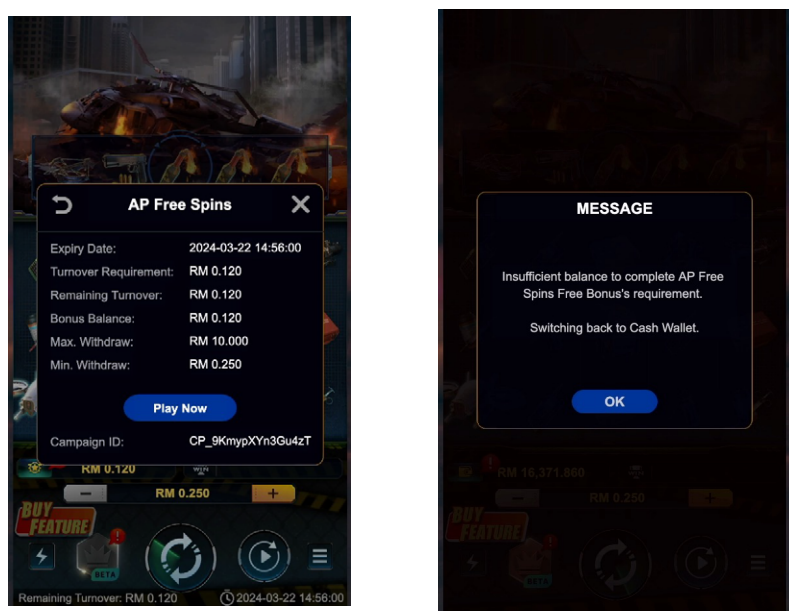

Detailed Flow 2

When a player is eligible for the free spins, a pop-up message will appear during gameplay.

Once all free spins have been utilized and the winnings in the Free Spin Wallet fall **below the minimum stake**, players are deemed to have **failed** as they cannot proceed with fulfilling the turnover requirement in the Bonus Wallet.

FREE SPINS

SAMPLE COMPUTATION

Free Spins Value: **0.25 MYR**

Total Free Spins Allocated: **10**

Final Winning Amount from the Free Spins: **20 MYR**

Turnover Required: **20 MYR, with 1x turnover**

Minimum Withdrawal: **1 MYR**

Throughout the campaign, players will receive **10 Free Spins**, each valued at **0.25 MYR**, credited to their Free Spins Wallet. Once all 10 allocated free spins have been utilized, the resultant winnings, up to **20 MYR**, will be moved to the Bonus Wallet to satisfy the turnover requirements.

Players must achieve a turnover of 20 MYR within the Bonus Wallet to be eligible for withdrawal. Should the bonus balance surpass the maximum withdrawal threshold after completing the turnover requirement, any remaining funds will be forfeited.

Example:

Maximum Withdrawal limit = **10 MYR**

After fulfilling the turnover requirement, the player's Bonus Wallet balance is **30 MYR**, but only **10 MYR** will be transferred to their **Cash Wallet**, and the system will **deduct** the remaining amount.
